

K2 Australian Small Cap Fund (Hedge Fund)

31 August 2020

The K2 Australian Small Cap Fund is an Absolute Return equities fund. The fund is index-unaware, aiming to produce positive absolute returns over the long term with a capital preservation mindset. The Fund's mandate allows it to actively manage its net market exposure – utilising both cash and shorts to help protect clients' capital.

Commentary

The K2 Australian Small Cap Fund returned 11.3% for the month of August. This was the single largest monthly return for the fund since inception. The fund has performed strongly for five consecutive months and has returned a very robust +38% since 31 March outperforming the benchmark. A combination of good stock selection and investing cash early in the cycle have contributed to the strong excess return of +4% vs benchmark for investors in just five months.

Since the COVID-19 virus emerged, more than half of the ASX200 companies have experienced EPS downgrades every month. Equity analysts appear to be mainly focused on household activity constraints and the subdued level of business investment. There appears to be little appreciation for the meaningful fiscal and monetary support and the fact that this stimulus will stay in place for quite some time yet. The global economic outlook is still uneven however current readings are certainly better than what was expected last quarter. In Australia, GDP expectations for the year ahead have already improved by nearly 2.5% over the past 6 months. Despite this, EPS forecasts continue to trend down. We believe that EPS projections will improve significantly over the year ahead and share prices should continue to move higher. The Fund continues to be optimistically positioned.

The best performing holdings for the Fund were Corporate Travel (CTD), People Infrastructure (PPE) and Money3 (MNY) which rose 83%, 16% and 26% respectively. Market participants love to hate CTD so, unsurprisingly during the 3 weeks leading up to CTD's 2H profit release, \$30 million was short sold. Despite difficult trading conditions, CTD delivered better costs and a stronger balance sheet. In addition, CTD, unlike its peers, did not need to embark upon a highly dilutive capital raising. This helped CTD rally strongly post result as short sellers scrambled to cover. PPE delivered a better than expected 50% improvement in its FY2020 profit and continues to look cheap on 13x FY2021 earnings. MNY is a provider of consumer finance for the purchase and maintenance of vehicles in Australia and New Zealand. During the month MNY announced a strong FY2020 result; the loan book rose 16% which led to more than 30% growth in the underlying EPS for the year.

The Fund's net exposure for the month averaged 89.4%. The median holding for the Fund has favourable characteristics when compared to the Small Ordinaries Index; the PE is 9% lower, ROE is 30% stronger, dividend yield is 17% higher and the EPS growth is 4%pa faster.

Fund Characteristics

FUM	AUD \$9m
Portfolio Managers	Campbell Neal, David Popenbeek and Josh Kitchen
Strategy	Australian and New Zealand Small Cap Equities
Objectives	To deliver consistent absolute returns over the investment cycle with a focus on capital protection during periods of market declines
